EyeC ProofRunner Carton Folder Gluer

Powered by Kohmann Pre-Feeder

Easily add print inspection to your folder gluer

Maximum ROI and flexibility

With the EyeC ProofRunner Carton Folder Gluer installed on the Kohmann pre-feeder module, combine **the latest print inspection technology with your existing folder gluer**. The flexible and movable **pre-feeder unit can easily be connected to any folder gluer** to convert it into the perfect inspection solution for folding cartons. The system is easy to maintain and guarantees safe handling of all cartons thanks to a high performance vacuum belt.

High speed **AND** high accuracy

Even if operated at a speed of 200 m/min (656 ft/min), the EyeC ProofRunner Carton Folder Gluer detects all relevant defects anywhere on the carton, including flaps. In just a few minutes, the system is set-up. As a result, you comply with even the highest requirements without slowing down production.

Ensure the highest standards

As required for most packaging materials for pharmaceutical, cosmetic, toiletry, and branded products, the EyeC ProofRunner Carton Folder Gluer **inspects 100% of the production** and compares it against the signed-off proof (typically a PDF file). **The system uses the folder gluer's existing ejection device to reject any defective item** and provides a full inspection report. As a result, quality requirements are met and customer rejects are avoided.

Ease-of-use

Operators enjoy an **extremely fast job set-up** as well as an **intuitive interface, available in all major languages**. The process is safe. Quality controls are simplified.

EyeC ProofRunner Carton Folder Gluer

Powered by Kohmann Pre-Feeder

Key features

- Flexible pre-feeder module Can easily be connected to any folder gluers.
- Highest performance Outstanding quality control, even at full speed.
- 100% job inspection Ensures quality and keeps customers satisfied.
- Automatic sorting of defective items Makes sure that only the correct items are delivered.
- Hot and cold stamping / reflecting surface inspection Addresses the different market needs.
- C Checks against customer proof or good to print PDF Performs a comprehensive content verification in any language and automates job set-up.
- Quick set-up and user-friendly interface The system is up and running in just a few minutes.
- High and low priority regions Meets quality requirements while limiting waste.
- Comprehensive inspection report Keeps track of inspection results and certifies quality.

Options

- Color monitoring
- 1D and 2D code reading (Barcodes, Data Matrix, QR Codes)
- Variable data inspection
- Automatic definition of priority regions
- C Defects heatmap
